Summary

A DigiPen Game Engineering student at Keimyung University. Primarily works with C++.

Completed coursework in game engine development and memory management and participated in team-based game development projects. Experience includes roles as Design Lead and Art Lead in team projects.

Experience

No formal work experience yet.

Sound Effects, Course Project 1

Sep 2023 - Dec 2023

Daegu, Korea

Developed a 2D shooting game "He was a" as part of a 3-person team.

Contributed to early-stage brainstorming and managed game sound effects. Also participated in UI editing.

Design Lead, Course Project 2

Mar 2025 - Jun 2025

Daegu, Korea

Developed a turn-based action puzzle game "10 9 8.." as part of a 4-person team.

Designed game objects based on a chess concept. Led the overall game art direction and visual atmosphere.

Art Lead, Course Project 3

Sep 2025 - Present

Daegu, Korea

Currently developing a construction simulation game "IGY" as part of a 5-person team.

Creating pixel-based buildings and character assets. Refining visual elements to clearly convey the game's purpose and direction.

LEADERSHIP EXPERIENCE

Took a leading role in refining and developing initial ideas during the early design phase of the course project "He was a".

In "10 9 8.", provided concept art idea sketches during the game object selection process, aligned with the intended atmosphere.

Education

Keimyung University

Digipen Game Engineering, In Progress.

2023 - Present

Skills

C++(C++17) programming, OpenGL 3.0, Considering Completeness, UX, Structural design in Game Design
